Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 9, 11 and 12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ichino (4,823,612).

Ichino teaches an ultrasonic flowmeter comprising a pipe segment (10) connected to a first pipe and a second pipe, a first and second standard connection located at the first and second end of the pipe segment in form of standard flanges, a primary flow sensor comprising at least one ultrasonic transducer for transmission and/or reception of ultrasonic signals and a sensor electronic for providing measurement signals representing the fluid flow. The transducers are inserted in opposite bores in the pipe segment on the outside walls.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 10 and 13-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ichino in view of Feller (6,508,134).

Ichino shows all the features of the instant invention except the pipe section being welded to the pipe segment. It would be within the scope of a skilled individual to use any known technique

such as welding or bolting the pipe sections to the pipe connectors in order to form a leak-proof connection between the two elements. As to the housing for electronics mounted on the pipe segment, Feller teaches a housing mounted on the pipe segment. It would be obvious to a person having ordinary skill in the art to provide a housing of Feller for housing the electronics of Ichino since such an arrangement would provide easy access of the electronic when needed. As to the cable connector, it would be a required element for connecting the transducers to the electronics within the housing.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tschirner (5,090,252) and Ehrlich et al. (2003/0084732) teach a pipe section that can be mounted between two pipe sections.
